

Traffic and Parking Controls

It is the policy of Edmonds School District that building administrators, in consultation with the district's safety officer and maintenance department, shall designate entrance/exit routes and parking areas for the use of staff, students, the public and handicapped persons. Building parking permits may be used if deemed necessary for the safe and efficient operation of the school or facility.

Vehicles parked in a restricted area without proper authorization or abandoned on district property may be impounded in cooperation with the police authority within whose jurisdiction the property is located.
