

Downed Timber Disposal

The district shall maintain a program that provides for the disposal of downed timber located on district property. The program will include, but not be limited to, the following elements:

1. Maintaining a list of individuals interested in obtaining the downed timber for personal uses (e.g., firewood, woodworking).
2. Contacting interested individuals when downed timber, the fair market value of which, in the reasonable estimates of the district's Planning and Property Management, is less than the cost of removal.
3. Requiring interested individuals to sign a release that (i) releases the district from any liability associated with the downed timber and (ii) prevents the interested individual from using methods of removal that have the potential for harming both persons and property (e.g., axes, chainsaws, circular saws).
