

About Washington State High School Boys Volleyball Association

WSHSBVA's sole purpose is to find new inexpensive ways for students to play interscholastic sports. The benefits of students involved with sports are well documented and include better grades, better attendance and an overall greater high school experience. Team sports also create a common bond between teammates that also enhances the high school experience.

The Association is emphatic in producing high quality events. Another core tenant of ours is to produce high quality coaches. We do this while balancing the needs of the students, athletic directors and member schools.
